

RESILIENCE · NIS2 · CER DIRECTIVE

Business Continuity Plan (BCP)

The CER Directive and NIS2 require critical operators not only to protect their infrastructure but to ensure they can keep operating if attacked or disrupted. The BCP is the response to that requirement.

WHO IS THIS FOR?

- Operators under NIS2 and the CER Directive
- Companies with high technological dependency
- Large operators with demanding customers

DEADLINE / KEY DATA

3-5
weeks
Delivery time

WHAT IS INCLUDED?

- ✓ Business Impact Analysis (BIA): critical processes and dependencies
- ✓ Recovery objective definition: RTO and RPO per process
- ✓ Identification and evaluation of recovery strategies
- ✓ Full Business Continuity Plan elaboration
- ✓ Crisis management and emergency communication plans
- ✓ BCP activation and deactivation protocols
- ✓ Simulation and continuity testing programme
- ✓ Alignment report with ISO 22301 and the CER Directive

REGULATORY FRAMEWORK

CER Directive (EU)	Requires physical and organisational resilience measures for critical entities, including continuity of operations.
NIS2 (EU)	Requires incident management, service recovery and continuity plans for essential and important entities.
RD 43/2021	Transposes the NIS Directive in Spain: continuity obligations for operators of essential services.
ISO 22301	International business continuity management standard. The BCP is designed in line with its principles.

WORKING PROCESS

01**WEEK 1****Business impact analysis (BIA)**

Identification of critical processes, dependencies, maximum tolerable downtime and minimum resources required.

02**WEEK 2****Recovery strategies**

Evaluation and selection of alternatives to ensure continuity: redundancy, reciprocal agreements, alternative sites.

03**WEEK 3-4****BCP drafting**

Drafting of the full plan with response procedures, roles, contacts and activation protocols.

04**WEEK 4-5****Testing and validation**

Activation exercise, review of results and plan adjustment before final delivery.

KEY DELIVERABLES

- BIA report: critical processes, dependencies and recovery thresholds
- Complete Business Continuity Plan with activation procedures
- Role and responsibility sheets for the Continuity Team
- Annual programme of exercises and tests
- Alignment report with ISO 22301 and NIS2/CER regulations
